

Chief Statistician's Report

2017/2018

Not too much to report on this season.

We had far fewer problems with people completing Electronic Game Sheets and, by-and-large there were fewer late submissions of said EGS.

My statisticians and I continue to monitor every EGS entered, checking for ineligible players and data errors.

If we find a problem, we will contact the relevant person/team for clarification. We do this because stats are important to a player's career, and must be accurate.

We often get asked to change goals and assists – please remember that we take the referee's word as law, and only make changes reluctantly.

For the 2018-2019 season, I have lost 2 of my statisticians.

Craig Simpson is moving on to media duties for the EIHA.

Laurie Wilcox has decided to step down as NIHL statistician.

I heartily thank both of them for the many years of service they have put in. They will be sorely missed.

Please keep up the good work, everyone!

Kevin Garrad

EIHA Chief Statistician
